

PRESENTING THE ELECTRICAL GT

a milestone
our continuing drive
for excellence

126 It's a perfect example of cutting-edge technology tempered with concern for the environment. Powered by electricity, the least polluting of all alternative fuels, the Electricar GTP by Solar Electric Engineering lets you live life in the fast lane — and breathe a little easier in the process.

Smooth, quiet, and virtually nonpolluting, the Electricar GTP is ideal as a second car. Its nearly silent, yet powerful, motor rapidly accelerates you up to speeds of 80 mph. Recharging can take as little as 2 to 4 hours or can be accomplished overnight by using a standard 110-volt household outlet. Operating the Electricar GTP costs less than 3 cents a mile or \$1.50 a fill-up, compared to 6 cents a mile for the average gasoline-powered car — and it's a whopping 90% less polluting, even taking power plant emissions into consideration.

The Electricar GTP is certified by the California Air Resources Board and is exempt from all smog tests and fees. Basic maintenance is surprisingly minimal and may be performed at any reputable service center, although specialized service personnel exist in every state. Price includes a 12-month warranty. Tax credits, sales tax exemptions, and tax deductions are offered by the IRS and some states. The Electricar GTP, in the color of your choice, is available exclusively at Neiman Marcus.

126. Electricar GTP, 75,000.00. Maximum shipping charge coast-to-coast, 1000.00. Allow 90 days for delivery. For more information or to order, call 1-800-825-8000, ext. 6303.

Note: Our sincere thanks to Leslie Nielsen, who admits his test drive of the Electricar GTP gave him quite a charge. At his request, for his appearance in this book, donations have been made by Neiman Marcus to Tree People and the Earth Options Institute.
